面部識別 Face ID

人臉識別技術
Face Recognition Technology

通過先進的人臉識別技術，為您提供安全、便捷的門禁解決方案。無需密碼或鑰匙，只需一個簡單的面部掃描，即可輕鬆開啟您的門。
Through advanced facial recognition technology, we provide you with a secure and convenient access control solution. No passwords or keys are needed, just a simple facial scan to effortlessly open your door.

高解析度攝像頭
Advanced Infrared Camera

高解析度攝像頭提供清晰的視覺效果，即使在低光環境下也能確保安全。紅外線技術確保在夜間或低光環境下，仍能清晰捕捉面部特征，提高識別的準確性和安全性。
High-resolution cameras provide clear visuals, ensuring security even in low-light environments. Infrared technology ensures clear capture of facial features at night or in low-light conditions, enhancing recognition accuracy and security.

防盜鎖具
Metal Drive Angle

堅固的金屬防盜鎖具，為您的安全提供額外保障。即使面對暴力破壞，也能確保您的門保持緊閉，為您的家提供最可靠的安全保障。
Sturdy metal anti-theft locks provide additional security for your safety. Even in the face of forced entry, they ensure your door remains tightly closed, providing the most reliable security for your home.

防偷窺鍵盤
Camouflage Noise Guide

門鎖的鍵盤設計經過巧妙，即使有人試圖偷窺密碼，也難以成功。這種設計確保了您的安全，即使在公共場合使用門鎖，也能保持隱私。
The keypad design of the door lock is cleverly designed, even if someone attempts to peek at the password, it is difficult to succeed. This design ensures your safety, even when using the door lock in public spaces, it maintains privacy.

指紋識別 Real Identifiling

指紋識別技術提供了一種快速、安全的方式來解鎖門鎖。只需輕觸指紋傳感器，即可輕鬆開啟您的門，無需鑰匙或密碼。
Fingerprint recognition technology provides a quick and secure way to unlock the door lock. Just a gentle touch on the fingerprint sensor, and the door will effortlessly open, without the need for keys or passwords.

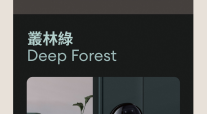
單手操作 一步工序
Handle Free Access Management

通過三步驟一鍵開啟的操作方式，大幅簡化了傳統門鎖的繁瑣流程。只需簡單的三個步驟，即可輕鬆開啟您的門，為您帶來更加便捷的生活體驗。
Through a three-step one-click opening method, the traditional door lock cumbersome process is greatly simplified. With just three simple steps, the door can be easily opened, bringing you a more convenient lifestyle experience.

門鎖設計小心思
Innovative Solutions

防偷窺鍵盤設計
Camouflage Noise Guide

門鎖的鍵盤設計經過巧妙，即使有人試圖偷窺密碼，也難以成功。這種設計確保了您的安全，即使在公共場合使用門鎖，也能保持隱私。
The keypad design of the door lock is cleverly designed, even if someone attempts to peek at the password, it is difficult to succeed. This design ensures your safety, even when using the door lock in public spaces, it maintains privacy.



一步操作 大家為你 Simplified Door Opening

通過簡化的操作，確保您能夠輕鬆開啟門鎖，為您的安全和便利提供保障。這種設計考慮到了日常使用的實際需求，確保您能夠在緊急情況下迅速開啟門鎖，為您的安全提供保障。
Through simplified operations, ensure you can easily open the door lock, providing safety and convenience for you. This design takes into account the practical needs of daily use, ensuring you can quickly open the door lock in emergency situations, providing safety for you.

中控開關門鎖按 Manual Open & Close Lever

這款門鎖配備了中控開關門鎖按，提供了額外的便利性。您可以輕松地通過按鍵來開啟或關閉門鎖，無需使用鑰匙或密碼。
This door lock is equipped with a central control lever for opening and closing the door, providing additional convenience. You can easily open or close the door lock by pressing the lever, without the need for keys or passwords.

內建安全電池 Energy Saving Lithium Battery

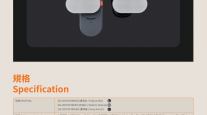
內建安全電池，為您的門鎖提供穩定的電源。這種設計確保了門鎖在任何情況下都能正常運作，為您的安全提供保障。
Built-in safe battery, providing stable power for your door lock. This design ensures the door lock can function normally in any situation, providing safety for you.

防撬報警功能 Anti-Tampering

當檢測到有人試圖撬開門鎖，門鎖會立即發出警報，以提醒您注意潛在的安全威脅。這種設計確保了您的安全，即使在您不在家的情況下，也能及時采取行動。
When detecting someone attempting to pry open the door lock, the door lock will immediately sound an alarm to remind you of potential safety threats. This design ensures your safety, even when you are not at home, allowing you to take action in a timely manner.

防誤操作設計 Welcome Function

通過智能識別技術，門鎖能夠自動檢測並防止誤操作，為您的安全提供額外保障。這種設計確保了您的安全，即使在您不小心操作門鎖的情況下，也能保持安全。
Through intelligent recognition technology, the door lock can automatically detect and prevent accidental operations, providing additional safety for you. This design ensures your safety, even if you accidentally operate the door lock, it can still maintain safety.



兩段式鎖上舌 Latch Bolt Method

內置鎖上舌，為門鎖提供額外的安全保障。這種設計確保了門鎖的穩定性，即使在強力撞擊下，也能保持緊閉。
Built-in latch bolt, providing additional security for the door lock. This design ensures the stability of the door lock, even under forceful impact, it can still remain tightly closed.
