MERIDIANO MEDIUM

Gabriele e Oscar Buratti, 2020

The "shape of light" is the central theme of this project by Gabriele and Oscar Buratti, which began with the Equatore family of lamps, presented in 2017 and now expanded to include other finishes, and continues with the new Meridiano and Tropico. Forms of glass and metal that collect, contain and diffuse light in space. Passing between opaline, coloured and transparent layers, emphasised by the refined curves and the magic of blown glass, the light is free to create surprising and fascinating effects, patterns and moods. In the new Meridiano lamp, the vertical cylindrical tube contains and diffuses the light in the transparent glass capsule, which defines its refined ovoid shape. Available in two sizes, Meridiano is available as a medium-size and large suspended lamp, to be used individually or in multiples arranged in groups. The table version is offered in the medium size.

Ceiling light providing diffused/direct light with double switch and partially dimmable 1:10 V. The double switch allows the central (dimmable) and lower part of the diffuser (on-off switch) to be switched on separately. Nickel-plated metal frame. External diffuser in blown glass. Internal diffuser in internally painted Pyrex glass. Steel suspension cable. Black power cable. Painted metal ceiling rose. Integrated LED.
